

# Maths Mastery Home Learning Challenge

## Adult Guidance

### What Are We Learning?

We are learning to make marks to and talk about them.

### How to Set up the Challenge

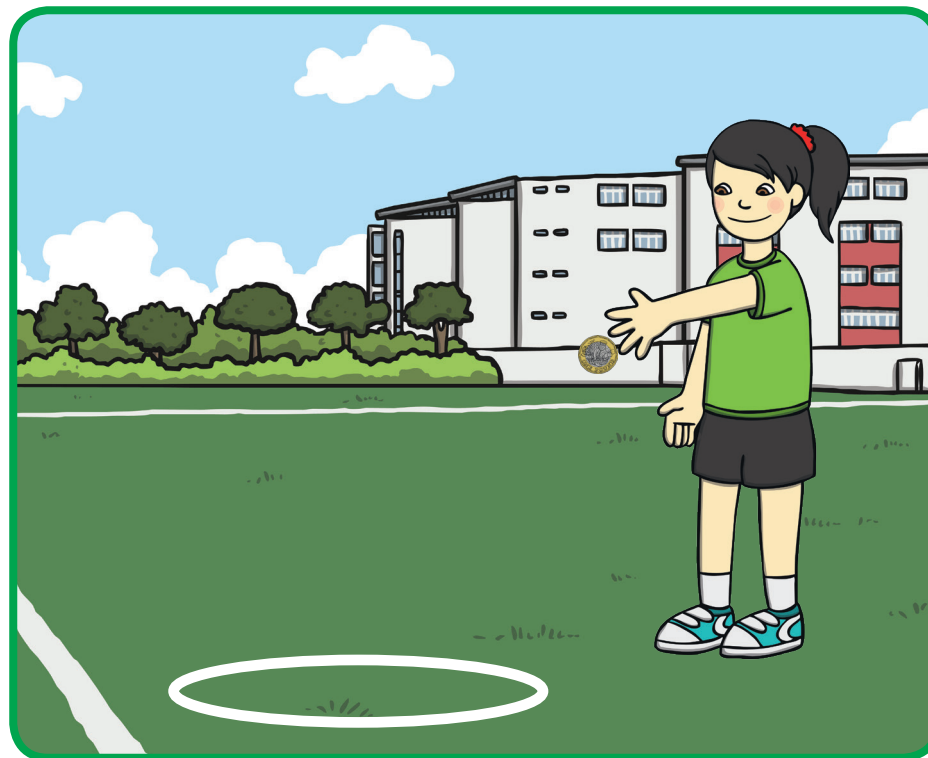

- Draw a chalk circle on the ground.
- Provide a coin that can be dropped or tossed into the circle.

### How to Get Your Child Thinking

- What mark could you make each time the coin lands in the circle?
- What do your marks tell us?
- Can you tell me about the marks you have made?
- How many times did the coin land in the circle?

# Coin Drop

- Try to drop or toss the coin so that it lands in the circle.
- If it lands in the circle, can you make one mark on the ground in chalk?
- Keep dropping the coin, making a mark each time it lands in the circle.
- How many times did it land in the circle? Can you talk about your marks?
